FUNCTIONALITY AND
WARMTH...

LIFESTYLES BY BARONS WELCOMES YOU HOME TO
Whistling Springs

Welcome to Whistling Springs, the ultimate entertaining space. By design, this lower level space is meant to be warm and inviting.

The granite bar is spacious and can accommodate six to eight guests comfortably. It is also fully loaded with two mini bars for storing favourite vintages and refreshments, as well as a built-in dishwasher, and Silgranit® sink.

Custom cabinetries in a dark wood finish tie the natural elements of the space together while architectural details come alive in the handles on closet doors, cascading display wall, and wall sconces.

The natural stone accent walls and backsplash are truly timeless as each piece is custom-cut directly from a mountain symbolizing the ultimate in strength and durability.

Likewise, another design element that Lifestyles has taken directly from nature is reflection and repetition of material. We've utilized the same flooring material as the flooring over the bar for a truly custom look.

LIFESTYLES BY BARONS WELCOMES YOU HOME TO
Whistling Springs

THE BEFORE

This unfinished basement was the perfect blank canvas for our team of designers. We immediately identified structural support issues and suggested high-end insulation solutions for the future home theatre and entertaining space. This space was also moisture protected during the construction phase of the project completely eliminating the damp basement odour.

THE DESIGN

Our design for the Whistling Springs project was inspired by the wants and needs of our client. As this family loves to entertain and have cozy movie nights together, a home theatre area was built into the far corner of the room, complete with a built-in fireplace solution, ample space for an oversized television, and a built in surround-sound system. A custom bar was also recommended for entertaining.

THE PROJECT

It became clear as soon as the design was approved for this lower level space that the bar was going to become the focal point of the room. With a rich granite countertop and stone accent wall, both lit beautifully by German-engineered lighting systems, the space comes to life. By introducing the same wooden floor on the ceiling of the bar area, the space became more defined and cozy.

THE ENTRY

The front of the home makes an impactful first impression. For this particular project, the front door revealed a less than pretty view of a door to the lower level. The configuration of this staircase was changed by opening up the space with a half-wall and a beautifully finished staircase. True wainscoting is our signature design element and adds class to the space.

THE STAIRCASE

The staircase to the basement was a closed configuration and was transitioned to an open design allowing for flow of furnishing elements and light between the levels. This space transitioned from builder-grade quality to a finished staircase.

THE COMPLETE BAR

The focal point of the room. The bar is a complete custom bar outfitted with a built-in custom fridge for beverage storage, wine fridge, dishwasher, and sink. The large granite countertop was chosen to add warmth to the room. State of the art lighting solutions and a natural stone backsplash/accent wall add visual interest.

THE HOME THEATRE

The home theatre space included built in cabinets for electronics storage. A surround sound system was built into the space to maximize sound quality. A modern fireplace added a homey feel but also warmed up the space with climate control. Our client introduced an oversized television with complete surround sound to the space.

THE LAUNDRY ROOM

In order to add resale value to this home, the lower level was completely finished in this home. The new laundry room is finished in the same granite as the bar and a complete sink and hamper storage system was designed to fulfill the client's needs. Lifestyles by Barons also procured and installed top-of-the-line appliances to the space.

THE FINISHED LOWER LEVEL

The resale value of this home has significantly increased with the renovation and addition of a Lifestyles by Barons custom basement.

This space has completely been redesigned with the client's lifestyle in mind.

It is completely functional with a large amount of hidden storage space; it is warm and inviting reimagined in wood tones and earth greens; and it is the perfect space for entertaining with spacious bar and lounge seating and built-in surround sound system.
